**LOS ALAMOS**  
**NATIONAL LABORATORY**

REQUEST NUMBER: 12-711

ATTN: Valerie Davis

General Engineering Laboratories, Inc., Charleston, SC.  
2040 Savage Rd  
Charleston, SC 29407

These Samples are on:

LANL Request Number: 12-711  
Per Agreement Number: 126310011  
Project Cost Code: MR1A015AGWJ0

Please analyse the enclosed samples  
according to the schedule indicated:

**SHIP DATE: 2/3/2012**  
**TURNAROUND/REPORT DUE: 3/4/2012**  
**TURNAROUND REQ'D: 30 Days**

**RAD SCREENING: Yes, Below Background**  
**LAB REQUEST COMMENTS:**

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed-upon date of resolution and contract laboratory point of contact):

1. Naphthalene was detected in the MB. The associated sample results were NDs and, thus, were not qualified.
2. The 1,2,3-trichlorobenzene result for sample CAAN-12-2026RA was analyzed  $>1X$  but  $\leq 2X$  the method specified HT. The associated sample result was an ND and, thus, was qualified UJ,V9.
3. The ICAL %RSDs were  $>15\%$  for bromoform and 1,2-dibromo-3-chloropropane. The associated sample results were NDs and, thus, were qualified UJ,V7a.
4. The ICAL, ICV and CCV RRFs were  $<0.05$  but  $\geq 0.01$  for acetonitrile, n-butyl alcohol, propionitrile, and isobutyl alcohol. The associated sample results were NDs and, thus, were qualified UJ,V7b.
5. The ICV and/or CCV %Ds were  $>20\%$  for dichlorodifluoromethane, acrolein, and 2-chloro-1,3-butadiene. The associated sample results were NDs and, thus, were qualified UJ,V7c.
6. It should be noted that the MSD %R were outside the laboratory's acceptance limits for iodomethane and carbon disulfide and ten target compounds were not represented in the MS/MSD spiking solution. It should also be noted that the MS/MSD analyses were performed on a LANL sample from another RN. However, MS/MSD analyses were not required for this method and, thus, no sample data were qualified.

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed-upon date of resolution and contract laboratory point of contact):

- The ICAL RRF was  $<0.05$  but  $\geq 0.01$  for atrazine. The associated sample result was an ND and, thus, was qualified UJ,SV7b.
- The ICV and/or CCV %Ds were  $>20\%$  for hexachlorocyclopentadiene; 4-nitrophenol; and p-nitroaniline. The associated sample results were NDs and, thus, were qualified UJ,SV7c.
- The 2-fluorophenol surrogate %R was  $>$  the laboratory's UAL for the MSD. Since this was a QC sample, no sample data were qualified.
- The LCS %Rs were  $<$  the laboratory's LALs but  $\geq 10\%$  for benzoic acid and benzidine. The associated sample results were NDs and, thus, were qualified UJ,SV12a.
- It should be noted that the MS/MSD analyses were performed on a LANL sample from another RN. No sample data were qualified.
- It should be noted that four target compounds were not represented in the LCS and MS/MSD spiking solutions. No sample data were qualified.

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed-upon date of resolution and contract laboratory point of contact):

1. It should be noted that the parent sample for the MS/MSD analyses was a LANL sample from another RN and the raw data for the parent sample were not included in the data package. No sample data were qualified as a result.
2. It should also be noted that the raw ICAL data from the instrument used for the secondary HE analysis were not reported in the data package. Thus, the surrogate retention time criteria could not be evaluated. No sample data were qualified as a result.

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed-upon date of resolution and contract laboratory point of contact):

1. The MS %R was < the laboratory's LAL but  $\geq 10\%$  for TKN. The associated sample result was an ND and, thus, was qualified UJ,I6a.
2. It should be noted that the parent samples for the QC analyses were LANL samples from other RNs. No sample data were qualified as a result.
3. Some analyses included multiple matrix QC samples. For each batch, the QC sample most comparable to the matrix of this RN was selected for data validation purposes, and the extraneous QC samples were not evaluated.

Re: LANL-WQH Water Samples  
Work Order: 295388  
SDG: 12-711

Dear Ms. Valdez:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the following analytical results for the sample(s) we received on February 04, 2012, and analyzed for Explosives by LCMSMS, GC/MS Semivolatile, GC/MS Volatile and General Chemistry. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4485.

Sincerely,

Valerie Davis  
Project Manager

**Summary**

**Sample receipt** The samples arrived at GEL Laboratories LLC, Charleston, South Carolina on February 04, 2012 for analysis. The samples were prepared/analyzed within the required holding time. Shipping container temperatures were checked, documented, and within specifications. The samples were screened according to GEL Standard Operating Procedure. Please see attached email for discrepancies. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C).

**Sample Identification** The laboratory received the following samples:

| <b><u>Laboratory ID</u></b> | <b><u>Client ID</u></b> |
|-----------------------------|-------------------------|
| 295388001                   | CAAN-12-2024            |
| 295388002                   | CAAN-12-2024            |
| 295388003                   | CAAN-12-2025            |
| 295388004                   | CAAN-12-2026            |

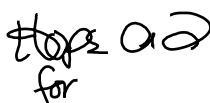

**Case Narrative**

Sample analyses were conducted using methodology as outlined in GEL Laboratories, LLC (GEL) Standard Operating Procedures. Any technical or administrative problems during analysis, data review, and reduction are contained in the analytical case narratives in the enclosed data package.

**Data Package**

The enclosed data package contains the following sections: Case Narrative, Chain of Custody, Cooler Receipt Checklist, Data Package Qualifier Definitions and data from the following fractions: Explosives by LCMSMS, GC/MS Semivolatile, GC/MS Volatile and General Chemistry.

I certify that this data report is in compliance with the terms and conditions of the subcontract and task order, both technically and for completeness, for other than the conditions detailed in the attached case narrative.

Valerie Davis  
Project Manager

**Subject:** ISSUES FROM TODAY 02/04/12  
**From:** Pat Dent <Pat.Dent@gel.com>  
**Date:** Sat, 04 Feb 2012 13:07:39 -0500  
**To:** "Keith R. Greene" <kgreene@lanl.gov>  
**CC:** Joylene Valdez <joylenev@lanl.gov>, LANL@amrad.com, "team.davis" <team.davis@gel.com>

Good Afternoon all listed below are today's issues 02/04/12

The containers received for Gross A/B was preserved prior to analysis

RN#12-711 the lab received (2)-SVOA, (2)- NMEDHEXP containers for CAAN-12-2024 the COC indicates (3)  
RN#12-711 the lab received (1)-8260B VOA container for CAAN-12-2026 the COC indicates (2).

RN#12-712,719 the lab did not receive Ra226+228 containers for CAAN-12-2024,CAWA-12-2018.

RN#12-718 the lab received (1)-8260B VOA container for CAWA-12-2020 the COC indicates (2).

Thanks!  
Pat Dent

# **Data Review Qualifier Flag Definition Sheet**

## Data Review Qualifier Definitions

| Qualifier | Explanation |
|-----------|-------------|
|-----------|-------------|

|     |   |
|-----|---|
| *   | A quality control analyte recovery is outside of specified acceptance criteria  |
| **  | Analyte is a surrogate compound   |
| <   | Result is less than value reported  |
| >   | Result is greater than value reported   |
| ^   | RPD of sample and duplicate evaluated using +/-RL. Concentrations are <5X the RL  |
| A   | The TIC is a suspected aldol-condensation product   |
| B   | Target analyte was detected in the associated blank   |
| B   | Metals-Either presence of analyte detected in the associated blank, or<br>MDL/IDL < sample value < PQL  |
| BD  | Results are either below the MDC or tracer recovery is low  |
| C   | Analyte has been confirmed by GC/MS analysis  |
| D   | Results are reported from a diluted aliquot of the sample   |
| d   | 5-day BOD-The 2:1 depletion requirement was not met for this sample   |
| E   | Organics-Concentration of the target analyte exceeds the instrument calibration range   |
| E   | Metals-%difference of sample and SD is >10%. Sample concentration must meet flagging criteria   |
| H   | Analytical holding time was exceeded  |
| h   | Preparation or preservation holding time was exceeded   |
| J   | Value is estimated  |
| N   | Metals-The Matrix spike sample recovery is not within specified control limits  |
| N   | Organics-Presumptive evidence based on mass spectral library search to make a tentative<br>identification of the analyte (TIC). Quantitation is based on nearest internal standard<br>response factor |
| N/A | Spike recovery limits do not apply. Sample concentration exceeds spike concentration<br>by 4X or more   |
| ND  | Analyte concentration is not detected above the reporting limit   |
| UI  | Gamma Spectroscopy-Uncertain identification   |
| X   | Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier  |
| Y   | QC Samples were not spiked with this compound   |
| Z   | Paint Filter Test-Particulates passed through the filter, however no free liquids were observed.  |

# **Volatile Analysis**

# Case Narrative

**ChemStation Case Narrative  
ARS International (ARSL)  
SDG 12-711**

**Method/Analysis Information**

**Procedure:** Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer

Analytical Method: SW846 8260B DOE-AL

Analytical Batch Number: 1188640

**Sample Analysis**

The following client and quality control samples were analyzed to complete this SDG using the methods referenced in the Analysis Information section:

| <b>Sample ID</b> | <b>Client ID</b>                                   |
|------------------|--|
| 295388001        | CAAN-12-2024                                       |
| 295388004        | CAAN-12-2026                                       |
| 1202599787       | Method Blank (MB)                                  |
| 1202599788       | 295435003(CAWA-12-2023) Post Spike (PS)            |
| 1202599789       | 295435003(CAWA-12-2023) Post Spike Duplicate (PSD) |
| 1202599790       | Laboratory Control Sample (LCS)                    |
| 1202599791       | Laboratory Control Sample (LCS)                    |
| 1202600766       | Method Blank (MB)                                  |
| 1202600767       | Laboratory Control Sample (LCS)                    |
| 1202600768       | Laboratory Control Sample (LCS)                    |

NOTE: For volatile organic analyses the matrix spike designations may be indicated as "PS" or "PSD". The "PS" designation (post spike) indicates that the matrix was fortified prior to analysis but after applying any prep factors, such as a dilution. The laboratory considers the MS/MSD and PS/PSD designations interchangeable.

The samples in this SDG were analyzed on an "as received" basis.

**Preparation/Analytical Method Verification**

**SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-OA-E-038 REV# 16.

Raw data reports are processed and reviewed by the analyst using the Chemstation software package. False positives have been removed from the quantitation reports per standard operating procedures (SOP) section 19.1.2. False positive analytes are designated on the quantitation report with a 'd' qualifier.

**Calibration Information**

Please note that the 'Cal Date' indicated on each quantitation report reflects the date and time of the most recent calibrated analyte(s) in the processing method. Since the laboratory may calibrate with multiple solutions on different days using the same processing method, the software will update the 'Cal Date' to the last calibration file, date and time. The correct dates and times for all calibration files are located on the Calibration History report in the Standard Data section in the data package.

The surrogate compounds were calibrated using a minimum five-point calibration curve. The surrogates were added

by the auto sampler at a concentration of 50 ug/L. GEL Laboratories LLC will not have surrogate recoveries reported for Dibromofluoromethane. This is due to increased regulations for this analyte and an industry shortage.

A complete list of the initial calibration data files are shown in the Calibration History report located in the Standard Data section of the data package.

#### **Initial Calibration**

For any analytes that did not pass the x-intercept criteria of less than or equal to 3X MDL, they were put on Average at the request of the client because they were less than 60%.

#### **Continuing Calibration Verification Requirements**

All associated calibration verification standard(s) (ICV or CCV) met the acceptance criteria.

#### **Quality Control (QC) Information**

##### **Method Blank (MB) Statement**

Target analytes were detected in the blank 1202599787 (MB) below the reporting limit.

##### **Surrogate Recoveries**

Surrogate recoveries in all client and quality control samples were within the acceptance limits.

##### **Laboratory Control Sample (LCS) Recovery**

The LCS spike recoveries met the acceptance limits.

##### **QC Sample Designation**

Sample 295435003 (CAWA-12-2023) was designated for spike analysis.

##### **Matrix Spike (PS) Recovery Statement**

The spike recoveries were within the required acceptance limits.

##### **Matrix Spike Duplicate (PSD) Recovery Statement**

The spike duplicate 1202599789 (CAWA-12-2023) recoveries were not all within the acceptance limits. See the Data Exception Report in the miscellaneous section of the data package.

##### **Relative Percent Difference (RPD) Statement**

The RPDs between the matrix spike pair met the acceptance limits.

##### **Internal Standard (ISTD) Acceptance**

The internal standard responses in all client and quality control samples met the required acceptance criteria.

#### **Technical Information**

##### **Holding Time Specifications**

GEL assigns holding times based on the associated methodology, which assigns the date and time from sample collection or sample receipt. Those holding times expressed in hours are calculated in the ALPHALIMS system. Those holding times expressed as days expire at midnight on the day of expiration. Sample 295388004 (CAAN-12-2026) was initially analyzed within holding. However, the sample was re-analyzed outside the recommended holding time but within the two times the holding period. The sample was re-analyzed due to possible carry-over for 1,2,3-Trichlorobenzene from a previously analyzed sample. Only 1,2,3-Trichlorobenzene is reported from the out of holding analysis. See the Data Exception Report in the miscellaneous section of the deliverable.

##### **Sample Preservation and Integrity**

Sample 295388004 (CAAN-12-2026) was re-analyzed because the initial analysis contained possible carry-over from a previously analyzed sample. The client only provided one vial for the sample. As a result, the re-analysis aliquots were taken from a vial that contained head-space. See the Data Exception Report in the miscellaneous section of the deliverable.

**Sample Dilutions/Methanol Dilutions**

The samples in this SDG did not require dilutions.

**Sample Re-extraction/Re-analysis**

Sample 295388004 (CAAN-12-2026) was re-analyzed due to unacceptable recoveries in the initial analysis.

**Miscellaneous Information****Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. An electronic signature page inserted after the case narrative will include the data validator's signature and title. The signature page also includes the data qualifiers used in the fractional package. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

**Data Exception (DER) Documentation**

DER # 1052528 was generated for this SDG.

**Manual Integrations**

Data files associated with the initial calibration, continuing calibration check, and samples did not require manual integrations.

**TIC Comment**

Tentatively identified compounds (TIC) were required for this sample delivery group/work order. The tentatively identified compounds may include some silanols. These compounds were due to column or septum bleed and were not native to the affected samples. Please note that non-requested target analytes that are reported on the quantitation reports will not be present on the Form I. These detected analytes are included in the calibrated method and as a result cannot be reported on the TIC quantitation report.

**Additional Comments**

Sample 295388004 (CAAN-12-2026) was re-analyzed because the initial analysis contained possible carry-over from a previously analyzed sample. The client only provided one vial for the sample. As a result, the re-analysis aliquot was taken from a vial that contained head-space. See the Data Exception Report in the miscellaneous section of the deliverable.

**Residual Chlorine**

Residual Chlorine was not detected in any of the samples in this SDG.

**System Configuration**

The Volatile-GC/MS analysis was performed on the following instrument configuration:

| Instrument ID | Instrument   | System Configuration | Column ID | Column Description        | P & T Trap |
|---------------|--|----------------------|-----------|---------------------------|------------|
| VOA9.I        | Agilent 6890/5973 GC/MS w/ OI Eclipse/Archon Autosampler | HP6890/HP5973        | DB-624    | J&W, 60m x 0.25mm x 1.4um | Trap 10    |

## GEL LABORATORIES LLC

### Qualifier Definition Report for

ARSL001 ARS International (63641-10)

Client SDG: 12-711 GEL Work Order: 295388

#### The Qualifiers in this report are defined as follows:

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a surrogate compound
- B For General Chemistry and Organic analysis the target analyte was detected in the associated blank.
- H Analytical holding time was exceeded
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

#### Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Signature:

Name: Erin Haubert

Date: 02 MAR 2012

Title: Data Validator

| <b>Batch ID:</b><br>1188640   | <b>Sample Numbers:</b><br>295388004, 295392004, 1202599789, 1202599789 |  |                             |
| <b>Potentially affected work order(s)(SDG): 295388(12-711),295392(12-718),295435(12-726)</b><br><b>Application Issues:</b><br>Sample Analyzed out of Holding<br>Other<br>Failed Recovery for MSD/PSD  |  |  |                             |
| <b>Specification and Requirements</b><br><b>Exception Description:</b>  |  | <b>DER Disposition:</b>  |                             |
| 1. Sample 295388004 was analyzed out of hold.<br><br>2. QC sample 1202599789 (MSD) did not meet the acceptable criteria for Carbon disulfide and Iodomethane.<br><br>Carbon disulfide: 132% (Limits of: 69.00% - 130.00%)<br>Iodomethane: 127% (Limits of: 71.00% - 122.00%)<br><br>3. The second analyses of samples 295388004 and 295392004 were from client vials that contained "head space." |  | 1. The sample was initially analyzed within holding. There was possible carry-over for 1,2,3-Trichlorobenzene in the initial analysis. The sample was re-analyzed within two times the recommended holding time which satisfies the client's criteria. Only 1,2,3-Trichlorobenzene was reported from the out of holding analysis.<br><br>2. The associated MS recovered at the upper limits for both of these analytes. The RPD criteria were met. The results are reported.<br><br>3. The client only supplied the VOA lab with one vial for each of the samples (295388004 and 295392004). Therefore, the re-analyses for these samples were from vials that contained "head space." The samples were re-analyzed because there was possible carry-over for 1,2,3-Trichlorobenzene in the initial analyses. Only 1,2,3-Trichlorobenzene was reported from the out of holding analyses. |                             |

# Case Narrative

**Semi-Volatile Case Narrative  
ARS International (ARSL)  
SDG 12-711**

**Method/Analysis Information**

|                          |   |
|--------------------------|---|
| <b>Procedure:</b>        | <b>Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry</b> |
| Analytical Method:       | SW846 8270C   |
| Prep Method:             | SW846 3510C   |
| Analytical Batch Number: | 1186837   |
| Prep Batch Number:       | 1186831   |

**Sample Analysis**

The following samples were analyzed using the analytical protocol as established in SW846 8270C:

| <b>Sample ID</b> | <b>Client ID</b>                                     |
|------------------|--|
| 295388001        | CAAN-12-2024   |
| 1202595534       | Method Blank (MB)                                    |
| 1202595535       | Laboratory Control Sample (LCS)                      |
| 1202595536       | 295270002(CAAN-12-2031) Matrix Spike (MS)            |
| 1202595537       | 295270002(CAAN-12-2031) Matrix Spike Duplicate (MSD) |

The samples in this SDG were analyzed on an "as received" basis.

**Preparation/Analytical Method Verification**

**SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-OA-E-009 REV# 27.

Raw data reports are processed and reviewed by the analyst using the data analysis software package. False positives have been removed from the quantitation reports per standard operating procedures (SOP) section 18.2.

**Calibration Information**

Due to software limitations, the Form 6 may not indicate all the calibration files comprising the initial calibration. A complete list of the initial calibration data files are shown in the Calibration History report located in the Standard Data section of the data package. The various calibration mixes may not be calibrated using all of the calibration levels. In addition, not all of the mixes are calibrated using the same levels.

Diphenylamine has now superseded N-Nitroso-diphenylamine on Quantitation Reports, Initial Calibration Reports, Calibration Check Standard Reports, etc. Previous versions of EPA Methodologies referenced N-Nitroso-diphenylamine. However, as stated in EPA Methodology, "N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine." Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine will be reported as Diphenylamine on all reports and forms.

**Initial Calibration**

All initial calibration requirements have been met for this sample delivery group (SDG) in this batch. A second source initial calibration verification (ICV) was included in the standard section directly behind the initial calibration.

**CCV Requirements**

All associated calibration verification standard(s) (ICV or CCV) met the acceptance criteria.

**Quality Control (QC) Information****Method Blank (MB) Statement**

The MB analyzed with this SDG in this batch met the acceptance criteria.

**Surrogate Recoveries**

The MSD(1202595537) displayed one biased high surrogate. Please see the QC Summary for the specific recovery value. The MB, LCS and MS satisfied batch QC acceptance criteria (with the exception of Benzidine in the MS and MSD - see Spike Recovery Statements). Therefore, it was determined that the biased high failures were limited to the MSD sample only (the surrogate and spike recoveries were in general significantly higher in the MSD compared to the MS recoveries). Since the associated parent sample was reported as non-detected for all requested target analytes, a re-extraction was considered unnecessary and the data have been reported. Please see data exception report 1048967.

**Laboratory Control Sample (LCS) Recovery**

The LCS(1202595535) recovered Benzidine at 17.3% (limits: 23%-131%) and Benzoic acid 28.7% (limits: 30%-142%). The failures represented less than 5% of the total requested spike analyte list. That satisfied the acceptance criteria for the client and the data were reported. Please note, both Benzidine and Benzoic acid are designated as being poor responding analytes in the analytical method. This may account for the biased low recoveries for those analytes. Please see data exception report 1048967.

**QC Sample Designation**

Client sample 295270002 (CAAN-12-2031) from SDG 12-700 was selected for analysis as the matrix spike and matrix spike duplicate.

**Matrix Spike (MS) Recovery Statement**

The MS(1202595536) recovered Benzidine at 29.6%. The limits are 30%-120%. Since the MS(1202595536) and MSD(1202595537) displayed similar recoveries for Benzidine, the failures may attributed to matrix interference. Please note, Benzidine is designated as being poor responding analyte in the analytical method. This may account for the biased low recoveries for that analyte in the MS and MSD. Please see data exception report 1048967.

**Matrix Spike Duplicate (MSD) Recovery Statement**

The MSD(1202595537(CAAN-12-2031)) recovered Benzidine at 27.5%. The limits are 30%-120%. Since the MS(1202595536(CAAN-12-2031)) and MSD(1202595537(CAAN-12-2031)) displayed similar recoveries for Benzidine, the failures may attributed to matrix interference. Please note, Benzidine is designated as being poor responding analyte in the analytical method. This may account for the biased low recoveries for that analyte in the MS and MSD. The MSD(1202595537(CAAN-12-2031)) multiple biased high spike recoveries. Please see the QC Summary for the specific recovery values. The MB, LCS and MS satisfied batch QC acceptance criteria (with the exception of Benzidine in the MS and MSD - see Spike Recovery Statements). Therefore, it was determined that the biased high failures were limited to the MSD sample only (the surrogate and spike recoveries were in general significantly higher in the MSD compared to the MS recoveries). Since the associated parent sample was reported as non-detected for all requested target analytes, a re-extraction was considered unnecessary and the data have been reported. The MSD also recovered N-Nitrosopyrrolidine at 130% (Limits are 51-115%), Atrazine at 120% (Limits are 38-112%) and 3,3'-Dichlorobenzidine at 114% (Limits are 28-112%). The latter three analytes were not detected in the associated samples. The data is unaffected and are reported. Please see data exception report 1048967.

**MS/MSD Relative Percent Difference (RPD) Statement**

The MS(1202595536) and MSD(1202595537) displayed multiple RPD value failures. Please see the QC Summary for the specific recovery values. The RPD failures were attributed to the biased high recoveries in the MSD (see the Spike Recovery Statement).

**Internal Standard (ISTD) Acceptance**

The internal standard responses were within the required acceptance criteria for all samples and QC.

**Technical Information:****Holding Time Specifications**

All samples in this SDG in this batch met the specified holding time. GEL assigns holding times based on the associated methodology that assigns the date and time from sample collection or sample receipt. Those holding times expressed in hours are calculated in the AlphaLIMS system. Those holding times expressed as days expire at midnight on the day of expiration.

**Preparation/Analytical Method Verification**

All procedures were performed as stated in the SOP. All reported compound mass spectra met the detection specifications in the method.

**Sample Dilutions**

The samples in this SDG in this batch did not require dilutions.

**Sample Re-extraction/Re-analysis**

The 1202595537(MSD) was re-analyzed. The re-analysis is reported.

**Miscellaneous Information:****Data Exception (DER) Documentation**

Data exception report 1048967 was generated for this SDG.

**Manual Integrations**

Some initial calibration standards, continuing calibration standards, and/or samples may require manual integrations due to software limitations. Manual integrations, if any, are included with the raw data.

**TIC Comment**

Tentatively identified compounds (TIC) may be requested for this sample delivery group/work order. Please note that non-requested target analytes that are reported on the quantitation reports will not be present on the Form I. These detected analytes are included in the calibrated method and as a result cannot be reported on the TIC quantitation report. TIC data, if requested, are included on the Sample Data Summary (Form 1) and are also included with the sample raw data.

**Additional Comments**

Additional comments were not required for the SDG associated samples in this batch.

**Electronic Package Comment**

The following package was generated using an electronic data processing program referred to as "virtual packaging". In an effort to increase quality and efficiency, the laboratory is developing systems to eventually generate all data packages electronically. The following change from "traditional" packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. An electronic signature page inserted after the case narrative of each electronic package will indicate the analyst, reviewer, and report specialist names associated with the generation of the data and package. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

**System Configuration**

The Semi-Volatile-GC/MS analysis was performed on the following instrument configuration:

| <b>Instrument ID</b> | <b>Instrument</b>                                   | <b>System Configuration</b> | <b>Column ID</b> | <b>Column Description</b>                            |
|----------------------|---|-----------------------------|------------------|--|
| MSD3.I               | Agilent 7890A/5975C<br>GC/MS w/ 7683<br>Autosampler | HP7890A/HP5975C             | DB-5MS           | 25m x 0.2mm, 0.33um (5%<br>Phenylmethylpolysiloxane) |

**Certification Statement**

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

## GEL LABORATORIES LLC

2040 Savage Road Charleston SC 29407 - (843) 556-8171 - www.gel.com

### Qualifier Definition Report for

ARSL001 ARS International (63641-10)

Client SDG: 12-711 GEL Work Order: 295388

#### The Qualifiers in this report are defined as follows:

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a surrogate compound
- E Organics--Concentration of the target analyte exceeds the instrument calibration range
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

#### Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Signature: 

Name: Herbert Maier

Date: 23 FEB 2012

Title: Data Validator

**Potentially affected work order(s)(SDG): 295270(12-700),295388(12-711),295392(12-718),295435(12-726)**

**Application Issues:**

Failed Recovery for MS/PS  
Failed RPD for MS/MSD, or PS/PSD  
Failed Recovery for LCS/LCSD  
Failed Yield for Surrogates  
Failed Recovery for MSD/PSD

**Specification and Requirements  
Exception Description:**

1. The LCS(1202595535) recovered Benzidine at 17.3% (limits: 23%-131%) and Benzoic acid 28.7% (limits: 30%-142%).
2. The MS(1202595536) and MSD(1202595537) recovered Benzidine at 29.6% and 27.5%, respectively. The limits are 30%-120%. The MSD also recovered N-Nitrosopyrrolidine at 130% (Limits are 51-115%), Atrazine at 120% (Limits are 38-112%) and 3,3'-Dichlorobenzidine at 114% (Limits are 28-112%).
3. The MSD(1202595537) displayed one biased high surrogate and multiple biased high spike recoveries. Please see the QC Summary for the specific recovery values.
4. The MS(1202595536) and MSD(1202595537) displayed multiple RPD value failures. Please see the QC Summary for the specific recovery values.

**DER Disposition:**

1. The failures represented less than 5% of the total requested spike analyte list. That satisfied the acceptance criteria for the client and the data were reported. Please note, both Benzidine and Benzoic acid are designated as being poor responding analytes in the analytical method. This may account for the biased low recoveries for those analytes.
2. Since the MS(1202595536) and MSD(1202595537) displayed similar recoveries for Benzidine, the failures may attributed to matrix interference. Please note, Benzidine is designated as being poor responding analyte in the analytical method. This may account for the biased low recoveries for that analyte in the MS and MSD. The latter three analytes were not detected in the associated samples. The data is unaffected and are reported.
3. The MB, LCS and MS satisfied batch QC acceptance criteria (with the exception of Benzidine in the MS and MSD - see item #2 above). Therefore, it was determined that the biased high failures were limited to the MSD sample only (the surrogate and spike recoveries were in general significantly higher in the MSD compared to the MS recoveries). Since the associated parent sample was reported as non-detected for all requested target analytes, a re-extraction was considered un-necessary and the data have been reported.
4. The RPD failures were attributed to the biased high recoveries in the MSD (see item #3 above).

# **Explosives by LCMSMS Analysis**

# Case Narrative

**LC/MS/MS Case Narrative  
ARS International (ARSL)  
SDG 12-711**

**Method/Analysis Information**

**Procedure:** **Definitive Low Level Analysis of Nitroaromatic Explosives Utilizing Liquid Chromatography / Mass Spectrometry / Mass Spectrometry (LC/MS/MS) by SW-846 Method 8321 Modified (8321M)**

Analytical Method: SW846 3535/8321A Modified

Prep Method: SW846 Method 3535

Analytical Batch Number: 1185693

Prep Batch Number: 1185692

**Sample Analysis**

The following samples were analyzed using the analytical protocol as established in SW846 3535/8321A Modified :

| <b>Sample ID</b> | <b>Client ID</b>                                     |
|------------------|--|
| 295388002        | CAAN-12-2024   |
| 1202592978       | Method Blank (MB)                                    |
| 1202592979       | Laboratory Control Sample (LCS)                      |
| 1202592980       | 295270003(CAAN-12-2031) Matrix Spike (MS)            |
| 1202592981       | 295270003(CAAN-12-2031) Matrix Spike Duplicate (MSD) |

**Preparation/Analytical Method Verification**

**SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-OA-E-056 REV# 16.

**Primary Analyte Analysis**

**Calibration Information**

**Initial Calibration**

All initial calibration requirements for this analysis have been met for this SDG.

**Calibration Verification Standard Requirements**

All associated calibration verification standard(s) (ICV or CCV) for this analysis met the acceptance criteria.

**Calibration Blank Requirements**

All initial or continuing calibration blanks (ICB or CCB) bracketing the analyses associated with this batch for this analysis were within acceptance criteria. Due to software limitations, the CCBs and/or the ICBs may have a concentration for target analytes in the Found column. These values should be zero.

**CRI Requirements**

All low level calibration verification (CRI) requirements for this analysis were met by all bracketing CRI standards.

**Quality Control (QC) Information****Method Blank (MB) Statement**

The MB(s) analyzed with this SDG for this analysis met the acceptance criteria.

**Surrogate Recoveries**

All the surrogate recoveries were within the established acceptance criteria in this SDG in this analytical batch for this analysis.

**Laboratory Control Sample (LCS) Recovery**

The LCS spike recoveries were within the established acceptance limits.

**QC Sample Designation**

Client sample 295270003 (CAAN-12-2031) from SDG 112-700 was chosen for matrix spike and matrix spike duplicate analysis.

**Matrix Spike (MS) Recovery Statement**

The MS spike recoveries were within the established acceptance limits.

**Matrix Spike Duplicate (MSD) Recovery Statement**

The MSD spike recoveries were within the established acceptance limits.

**MS/MSD Relative Percent Difference (RPD) Statement**

The RPD(s) between the MS and MSD met the acceptance limits for this analysis.

**Internal Standard (ISTD) Acceptance**

The internal standard responses were within the required acceptance criteria for all samples and QC in this SDG.

**Technical Information****Holding Time Specifications**

All samples in this SDG in this analytical batch met the specified holding time. GEL assigns holding times based on the associated methodology, which assigns the date and time from sample collection of sample receipt. Those holding times expressed in hours are calculated in the AlphaLIMS system. Those holding times expressed as days expire at midnight on the day of expiration.

**Preparation/Analytical Method Verification**

All procedures were performed as stated in the SOP.

**Sample Dilutions**

According to the GEL SOP for Method 8321A, all sample and QC extracts are diluted 1:1 v/v with HPLC grade water. The samples in this SDG in this analytical batch for this analysis did not require any additional dilutions.

**Sample Re-extraction/Re-analysis**

The SDG was re-analyzed due to a CCV failing acceptance criteria. The re-analysis passed acceptance criteria and is reported.

## **Secondary Analyte Analysis**

### **Calibration Information**

#### **Initial Calibration**

All initial calibration requirements for this analysis have been met for this SDG.

#### **Calibration Verification Standard Requirements**

All associated calibration verification standard(s) (ICV or CCV) for this analysis met the acceptance criteria.

#### **Calibration Blank Requirements**

All initial or continuing calibration blanks (ICB or CCB) bracketing the analyses associated with this batch for this analysis were within acceptance criteria. Due to software limitations, the CCBs and/or the ICBs may have a concentration for target analytes in the Found column. These values should be zero.

#### **CRI Requirements**

All low level calibration verification (CRI) requirements for this analysis were met by all bracketing CRI standards.

### **Quality Control (QC) Information**

#### **Method Blank (MB) Statement**

The MB(s) analyzed with this SDG for this analysis met the acceptance criteria.

#### **Surrogate Recoveries**

All the surrogate recoveries were within the established acceptance criteria in this SDG in this analytical batch for this analysis.

#### **Laboratory Control Sample (LCS) Recovery**

The LCS spike recoveries were within the established acceptance limits.

#### **QC Sample Designation**

Client sample 295270003 (CAAN-12-2031) from SDG 112-700 was chosen for matrix spike and matrix spike duplicate analysis.

#### **Matrix Spike (MS) Recovery Statement**

The MS spike recoveries were within the established acceptance limits.

#### **Matrix Spike Duplicate (MSD) Recovery Statement**

The MSD spike recoveries were within the established acceptance limits.

#### **MS/MSD Relative Percent Difference (RPD) Statement**

The RPD(s) between the MS and MSD met the acceptance limits for this analysis.

#### **Internal Standard (ISTD) Acceptance**

The internal standards were not added to the secondary analyte extracts.

### **Technical Information**

#### **Holding Time Specifications**

All samples in this SDG in this analytical batch met the specified holding time. GEL assigns holding times based on the associated methodology, which assigns the date and time from sample collection of sample receipt. Those holding times expressed in hours are calculated in the AlphaLIMS system. Those holding times expressed as days expire at midnight on the day of expiration.

**Preparation/Analytical Method Verification**

All procedures were performed as stated in the SOP.

**Sample Dilutions**

According to the GEL SOP for Method 8321A, all sample and QC extracts are diluted 1:1 v/v with HPLC grade water. The samples in this SDG in this analytical batch for this analysis did not require any additional dilutions.

**Sample Re-extraction/Re-analysis**

Re-extractions or re-analyses were not required in this SDG in this analytical batch for this analysis except for dilutions.

**Miscellaneous Information****Data Exception (DER) Documentation**

Data exception reports (DERs) are generated to document procedural anomalies that may deviate from referenced SOP or contractual documents. A data exception report (DER) was not generated for this SDG.

**Manual Integrations**

Some initial calibration standards, continuing calibration standards, and/or samples required manual integrations due to software limitations.

**Flagging Convention**

The sample was not originally analyzed using SW-846 Method 8330.

**Additional Comments**

Due to software limitations, all initial calibration blanks must be designated as XIB001 in order for the forms to be correct.

Due to software limitations in the Secondary analyte analysis, false positives and analytes detected below the MDL cannot be deleted from the raw data.

Due to software limitations, file extensions such as DL, RE, etc. may not appear on the generated forms and/or raw data.

**System Configuration**

The laboratory utilizes a Waters LC 2795 liquid chromatography instrument for primary analyte analysis. It is coupled with either a Micromass Quattro Micro Mass Spectrometer/ Mass Spectrometer, or a Micromass Quattro Ultima Mass Spectrometer/ Mass Spectrometer. Each being designated as LCMSMS #1 and LCMSMS #2, respectively. It is fitted with an APCI (Atmospheric Pressure chemical Ionization) probe that is operated in the negative ionization mode for the primary analyte analysis. The laboratory also utilizes an Agilent 1100 liquid chromatography instrument for either primary or secondary analyte analysis. It is coupled with an Applied Biosystems 4000 Mass Spectrometer/ Mass Spectrometer, designated as either LCMSMS #3 or LCMSMS #4. It is fitted with an APCI (Atmospheric Pressure chemical Ionization) probe that is operated in the negative ionization mode for both the primary and secondary analyte analysis.

**Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. An electronic signature page inserted after the case narrative will include the data validator's signature and title. The signature page also includes the data qualifiers used in the fractional package. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

**Chromatographic Columns**

The detection of the primary analyte nitroaromatic and nitramines is accomplished through analysis on the following reversed phase column:

Phenomenex: Ultracarb 5u ODS (20), 250 x 4.60 mm ID.

The detection of the secondary analytes is accomplished through analysis on the following reversed phase column:

YMC: J'sphere ODS-H80, 150 x 4.6mm I.D.

**Certification Statement**

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

### Qualifier Definition Report for

ARSL001 ARS International (63641-10)

Client SDG: 12-711 GEL Work Order: 295388

#### The Qualifiers in this report are defined as follows:

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a surrogate compound
- U Analyte was analyzed for, but not detected above the MDL, MDA, or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

#### Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Signature: 

Name: Herbert Maier

Date: 28 FEB 2012

Title: Data Validator

# **General Chem Analysis**

# Case Narrative

**General Chemistry Narrative  
ARS International (ARSL)  
SDG 12-711**

**Method/Analysis Information**

**Product:** Carbon, Total Organic

**Analytical Batch:** 1186182

**Method:** SW 9060 Total Organic Carbon

**Sample Analysis**

The following samples were analyzed using the analytical protocol as established in SW846 9060:

| <b>Sample ID</b> | <b>Client ID</b>                                    |
|------------------|---|
| 295388002        | CAAN-12-2024  |
| 1202594161       | Method Blank (MB)                                   |
| 1202594162       | 295075001(BuckmanPZ-12-2179) Sample Duplicate (DUP) |
| 1202594163       | 295392002(CAWA-12-2018) Sample Duplicate (DUP)      |
| 1202594164       | 295075001(BuckmanPZ-12-2179) Post Spike (PS)        |
| 1202594165       | 295392002(CAWA-12-2018) Post Spike (PS)             |
| 1202594166       | Laboratory Control Sample (LCS)                     |

The samples in this SDG were analyzed on an "as received" basis.

**SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-GC-E-093 REV# 9.

**Preparation/Analytical Method Verification**

The SOP stated above has been prepared based on technical research and testing conducted by GEL Laboratories, LLC. and with guidance from the regulatory documents listed in this "Method/Analysis Information" section.

**Calibration Information**

The Carbon analysis was performed on a O-I Analytical Model 1010 Total Organic Carbon Analyzer.

**Initial Calibration**

All initial calibration requirements have been met for this SDG.

**Continuing Calibration Blanks**

All continuing calibration blanks (CCBs) associated with reported data from this batch were within acceptance limits.

**Calibration Verification Information (CCV)**

All continuing calibration verification standards (CCVs) associated with reported data from this batch were within acceptance limits.

**Quality Control (QC) Information****Method Blank (MB) Statement**

The MB analyzed with this SDG met the acceptance criteria.

**Laboratory Control Sample (LCS) Recovery**

The LCS spike recovery met the acceptance limits.

**Quality Control (QC) Designation**

The following samples were selected for QC analysis: 295075001 (BuckmanPZ-12-2179) and 295392002 (CAWA-12-2018).

**Matrix Spike (MS)/Post Spike (PS) Recovery Statement**

The MS/PS recoveries for this sample set were within the required acceptance limits.

**Duplicate Relative Percent Difference (RPD) Statement**

The RPD between the sample and its duplicate met the acceptance limits.

**Technical Information**

GEL assigns holding times based on the date and time of sample collection. Those holding times expressed in hours are calculated in the AlphaLims system by hours. Those holding times expressed as days expire at midnight on the day of expiration.

**Holding Times**

All samples in this SDG met the specified holding time.

**Sample Dilutions**

The samples in this SDG did not require dilutions.

**Sample Re-analysis**

The samples in this SDG did not require re-analysis.

**Miscellaneous Information****Data Exception (DER) Documentation**

A DER was not required for this SDG.

**Additional Comments**

Additional comments were not required for this SDG.

**Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages

electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

### **Method/Analysis Information**

**Product:** Ammonia Nitrogen

**Analytical Batch:** 1186023      **Method:** EPA 350.1 Nitrogen and Ammonia L

**Prep Batch :** 1186022      **Method:** EEPA 350.2 Prep

### **Sample Analysis**

The following samples were analyzed using the analytical protocol as established in EPA 350.1:

| <b>Sample ID</b> | <b>Client ID</b>                                     |
|------------------|--|
| 295388003        | CAAN-12-2025   |
| 1202593853       | Method Blank (MB)                                    |
| 1202593854       | 295270001(CAAN-12-2030) Sample Duplicate (DUP)       |
| 1202593855       | 295270001(CAAN-12-2030) Matrix Spike (MS)            |
| 1202593856       | 295270001(CAAN-12-2030) Matrix Spike Duplicate (MSD) |
| 1202593857       | Laboratory Control Sample (LCS)                      |

The samples in this SDG were analyzed on an "as received" basis.

### **SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-GC-E-106 REV# 7.

### **Preparation/Analytical Method Verification**

The SOP stated above has been prepared based on technical research and testing conducted by GEL Laboratories, LLC. and with guidance from the regulatory documents listed in this "Method/Analysis Information" section.

### **Calibration Information**

The Nutrient analysis was performed on a Lachat QuickChem FIA+ 8000 Series.

### **Continuing Calibration Blanks**

All continuing calibration blanks (CCBs) associated with reported data from this batch were within acceptance limits.

### **Calibration Verification Information (CCV)**

All continuing calibration verification standards (CCVs) associated with reported data from this batch were within

acceptance limits.

**Y Intercept Rule**

The absolute value of the intercept is less than 3 times the MDL.

**Quality Control (QC) Information****Method Blank (MB) Statement**

The MB analyzed with this SDG met the acceptance criteria.

**Laboratory Control Sample (LCS) Recovery**

The LCS spike recovery met the acceptance limits.

**Quality Control (QC) Designation**

The following sample was selected for QC analysis: 295270001 (CAAN-12-2030).

**Matrix Spike (MS)/Post Spike (PS) Recovery Statement**

The MS/PS recovery for this sample set was within the required acceptance limits.

**Matrix Spike Duplicate (MSD) Recovery Statement**

The MSD recovery for this sample set was within the required acceptance limits.

**MS/MSD Relative Percent Difference (RPD) Statement**

The RPD between the spike and spike duplicate met the acceptance limits.

**Duplicate Relative Percent Difference (RPD) Statement**

The values for the sample and duplicate are less than the Practical Quantitation Limit (PQL); therefore, the RPD is not applicable. 1202593854 (CAAN-12-2030).

**Technical Information**

GEL assigns holding times based on the date and time of sample collection. Those holding times expressed in hours are calculated in the AlphaLims system by hours. Those holding times expressed as days expire at midnight on the day of expiration.

**Holding Times**

All samples in this SDG met the specified holding time.

**Sample Preservation/Integrity**

All the samples from this sample group met the preservation and integrity requirements of the method.

**Sample Dilutions**

The samples in this SDG did not require dilutions.

**Sample Re-analysis**

The samples in this SDG did not require re-analysis.

**Miscellaneous Information****Data Exception (DER) Documentation**

A DER was not required for this SDG.

**Additional Comments**

Additional comments were not required for this SDG.

**Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

### **Method/Analysis Information**

|                          |                                |                |                                   |
|--------------------------|--------------------------------|----------------|-----------------------------------|
| <b>Product:</b>          | <b>Total Kjeldahl Nitrogen</b> |                |                                   |

### **Sample Analysis**

The following samples were analyzed using the analytical protocol as established in EPA 351.2:

| <b>Sample ID</b> | <b>Client ID</b>                                     |
|------------------|--|
| 295388002        | CAAN-12-2024   |
| 1202593858       | Method Blank (MB)                                    |
| 1202593859       | 295270003(CAAN-12-2031) Sample Duplicate (DUP)       |
| 1202593860       | 295270003(CAAN-12-2031) Matrix Spike (MS)            |
| 1202593861       | 295270003(CAAN-12-2031) Matrix Spike Duplicate (MSD) |
| 1202593862       | Laboratory Control Sample (LCS)                      |

The samples in this SDG were analyzed on an "as received" basis.

### **SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-GC-E-104 REV# 11.

### **Preparation/Analytical Method Verification**

The SOP stated above has been prepared based on technical research and testing conducted by GEL Laboratories, LLC. and with guidance from the regulatory documents listed in this "Method/Analysis Information" section.

### **Calibration Information**

The Nutrient analysis was performed on a Lachat QuickChem FIA+ 8000 Series.

### **Continuing Calibration Blanks**

All continuing calibration blanks (CCBs) associated with reported data from this batch were within acceptance limits.

### **Calibration Verification Information (CCV)**

All continuing calibration verification standards (CCVs) associated with reported data from this batch were within

acceptance limits.

**Y Intercept Rule**

The absolute value of the intercept is less than 3 times the MDL.

**Quality Control (QC) Information**

**Method Blank (MB) Statement**

The MB analyzed with this SDG met the acceptance criteria.

**Laboratory Control Sample (LCS) Recovery**

The LCS spike recovery met the acceptance limits.

**Quality Control (QC) Designation**

The following sample was selected for QC analysis: 295270003 (CAAN-12-2031).

**Matrix Spike (MS)/Post Spike (PS) Recovery Statement**

The spike recovery falls outside of the GEL acceptance limits but within the client specified limits. 1202593860 (CAAN-12-2031).

**Matrix Spike Duplicate (MSD) Recovery Statement**

The spike duplicate recovery falls outside of the GEL acceptance limits but within the client specified limits. 1202593861 (CAAN-12-2031).

**MS/MSD Relative Percent Difference (RPD) Statement**

The RPD between the spike and spike duplicate met the acceptance limits.

**Duplicate Relative Percent Difference (RPD) Statement**

The RPD between the sample and its duplicate met the acceptance limits.

**Technical Information**

GEL assigns holding times based on the date and time of sample collection. Those holding times expressed in hours are calculated in the AlphaLims system by hours. Those holding times expressed as days expire at midnight on the day of expiration.

**Holding Times**

All samples in this SDG met the specified holding time.

**Sample Preservation/Integrity**

All the samples from this sample group met the preservation and integrity requirements of the method.

**Sample Dilutions**

The following sample in this sample group was diluted due to matrix interference: 295388002 (CAAN-12-2024).

**Sample Re-analysis**

The samples in this SDG did not require re-analysis.

**Miscellaneous Information**

**Data Exception (DER) Documentation**

The following DER was generated for this SDG: 1051875 1202593860 (CAAN-12-2031) and 1202593861

(CAAN-12-2031).

**Additional Comments**

Additional comments were not required for this SDG.

**Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

### **Method/Analysis Information**

**Product:** Nitrate Nitrite by Cadmium Reduction

**Analytical Batch:** 1186031

**Method:** EPA 353.2 Nitrogen and Nitrate/Nitrite

### **Sample Analysis**

The following samples were analyzed using the analytical protocol as established in EPA 353.2:

| <b>Sample ID</b> | <b>Client ID</b>                                    |
|------------------|---|
| 295388003        | CAAN-12-2025  |

The samples in this SDG were analyzed on an "as received" basis.

### **SOP Reference**

Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-GC-E-103 REV# 8.

### **Preparation/Analytical Method Verification**

The SOP stated above has been prepared based on technical research and testing conducted by GEL Laboratories, LLC. and with guidance from the regulatory documents listed in this "Method/Analysis Information" section.

### **Calibration Information**

The Nutrient analysis was performed on a Lachat QuickChem FIA+ 8000 Series.

### **Continuing Calibration Blanks**

All continuing calibration blanks (CCBs) associated with reported data from this batch were within acceptance limits.

### **Calibration Verification Information (CCV)**

All continuing calibration verification standards (CCVs) associated with reported data from this batch were within

acceptance limits.

**Y Intercept Rule**

The absolute value of the intercept is less than 3 times the MDL.

**Quality Control (QC) Information****Method Blank (MB) Statement**

The MB analyzed with this SDG met the acceptance criteria.

**Laboratory Control Sample (LCS) Recovery**

The LCS spike recovery met the acceptance limits.

**Quality Control (QC) Designation**

The following sample was selected for QC analysis: 295075001 (BuckmanPZ-12-2179).

**Matrix Spike (MS)/Post Spike (PS) Recovery Statement**

The MS/PS recovery for this sample set was within the required acceptance limits.

**Matrix Spike Duplicate (MSD) Recovery Statement**

The MSD recovery for this sample set was within the required acceptance limits.

**MS/MSD Relative Percent Difference (RPD) Statement**

The RPD between the spike and spike duplicate met the acceptance limits.

**Duplicate Relative Percent Difference (RPD) Statement**

The values for the sample and duplicate are less than the Practical Quantitation Limit (PQL); therefore, the RPD is not applicable. 1202593842 (BuckmanPZ-12-2179).

**Technical Information**

GEL assigns holding times based on the date and time of sample collection. Those holding times expressed in hours are calculated in the AlphaLims system by hours. Those holding times expressed as days expire at midnight on the day of expiration.

**Holding Times**

All samples in this SDG met the specified holding time.

**Sample Preservation/Integrity**

All the samples from this sample group met the preservation and integrity requirements of the method.

**Sample Dilutions**

The samples in this SDG did not require dilutions.

**Sample Re-analysis**

The following sample was re-analyzed due to instrument failure: 1202593841 (MB).

**Miscellaneous Information****Data Exception (DER) Documentation**

A DER was not required for this SDG.

**Additional Comments**

Additional comments were not required for this SDG.

**Electronic Packaging Comment**

This data package was generated using an electronic data processing program referred to as virtual packaging. In an effort to increase quality and efficiency, the laboratory has developed systems to generate all data packages electronically. The following change from traditional packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

**Certification Statement**

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

**Review Validation:**

GEL requires all analytical data to be verified by a qualified data validator. In addition, all data designated for CLP or CLP-like packaging will receive a third level validation upon completion of the data package.

**The following data validator verified the information presented in this case narrative:**

**The Qualifiers in this report are defined as follows:**

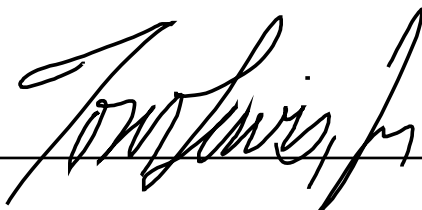

- \* A quality control analyte recovery is outside of specified acceptance criteria
- \*\* Analyte is a surrogate compound
- B For General Chemistry and Organic analysis the target analyte was detected in the associated blank.
- E Organics--Concentration of the target analyte exceeds the instrument calibration range
- H Analytical holding time was exceeded
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the detection limit.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Valerie Davis.

### Notes:

RER is calculated at the 95% confidence level (2-sigma).

The Qualifiers in this report are defined as follows:

- \*\* Analyte is a surrogate compound
- < Result is less than value reported
- > Result is greater than value reported
- A The TIC is a suspected aldol-condensation product
- B For General Chemistry and Organic analysis the target analyte was detected in the associated blank.
- C Analyte has been confirmed by GC/MS analysis
- D Results are reported from a diluted aliquot of the sample
- E General Chemistry--Concentration of the target analyte exceeds the instrument calibration range
- E Organics--Concentration of the target analyte exceeds the instrument calibration range
- F Estimated Value
- H Analytical holding time was exceeded
- J Value is estimated
- JNX Non Calibrated Compound
- M Matrix Related Failure
- N Organics--Presumptive evidence based on mass spectral library search to make a tentative identification of the analyte (TIC). Quantitation is based on nearest internal standard response factor
- N/A RPD or %Recovery limits do not apply.
- N1 See case narrative
- ND Analyte concentration is not detected above the detection limit
- NJ Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier
- P Organics--The concentrations between the primary and confirmation columns/detectors is >40% different. For HPLC, difference is also <70%
- Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
- R Sample results are rejected
- U Analyte was analyzed for, but not detected above the MDL, MDA, or LOD.

## QC Summary

Workorder: 295388

Page 3 of 3

| Parmname | NOM  | Sample | Qual | QC | Units | RPD% | REC% | Range | Anlst | Date | Time |
|----------|--|--------|------|----|-------|------|------|-------|-------|------|------|
| UJ       | Compound cannot be extracted   |        |      |    |       |      |      |       |       |      |      |
| X        | Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier                                     |        |      |    |       |      |      |       |       |      |      |
| Y        | QC Samples were not spiked with this compound  |        |      |    |       |      |      |       |       |      |      |
| Z        | Paint Filter Test--Particulates passed through the filter, however no free liquids were observed.                              |        |      |    |       |      |      |       |       |      |      |
| ^        | RPD of sample and duplicate evaluated using +/-RL. Concentrations are <5X the RL. Qualifier Not Applicable for Radiochemistry. |        |      |    |       |      |      |       |       |      |      |
| d        | 5-day BOD--The 2:1 depletion requirement was not met for this sample   |        |      |    |       |      |      |       |       |      |      |
| h        | Preparation or preservation holding time was exceeded  |        |      |    |       |      |      |       |       |      |      |

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more.

^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.

\* Indicates that a Quality Control parameter was not within specifications.

For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.
