**IDEA ID NO. 856 – LOS ALAMOS NATIONAL LABORATORY
2007 EMISSIONS INVENTORY REPORT REQUIRED UNDER 20.2.73 NMAC**

Dear Mr. Duffy:

Enclosed is the 2007 Emissions Inventory Update for Los Alamos National Laboratory (LANL or Laboratory), required by Title 20, Chapter 2, Part 73 of the New Mexico Administrative Code (20.2.73 NMAC), Notice of Intent and Emissions Inventory Requirements.

We have updated the Excel worksheets that you provided, using the guidance in your instructions for the *2007 New Mexico Emissions Inventory Update*. All changes made to the worksheets are highlighted in yellow (additions).

In general, criteria pollutant emissions from LANL sources in 2007 are similar to emissions reported last year. Additionally, please note the following for our inventory for 2007:

- From the NMED 2007 Emissions Inventory instructions, we are directed to “Report actual emissions of individual (speciated) hazardous air pollutants (HAPs) that are equal to or greater than 0.5 tons per year per emission unit.” Therefore, for each source, LANL has only reported HAPs that are equal to or greater than 0.5 tons per year.
- Emissions of radionuclides other than radon from Laboratory operations, as reported to EPA under 40 CFR 61 Subpart H, resulted in a maximum offsite dose of 0.47 mrem during 2006. For 2007, this offsite dose is estimated to be 0.5 mrem. A final dose for 2007 will be reported to EPA in June 2008.

This submittal includes a diskette (Attachment 1) containing electronic copies of the updated spreadsheets and a signed certification statement (Attachment 2). We have also included a summary report that was prepared at the completion of the Emissions
