NMED has reviewed the Plan and hereby issues this Approval with the following modifications.

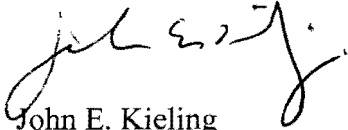

1. The Permittees must submit the final design for the grade-control structure (including fill behind the structure) and the stilling basin no later than **August 31, 2011**.
2. In the final design, the Permittees must include a design for a monitoring network for post-stabilization monitoring of the effectiveness of the stabilization measures.

3. In the final design, the Permittees must propose to remove all post-1942 alluvial sediments that are present within reach S-2 of Sandia Canyon below the grade-control structure, and to place these sediments as fill behind the grade-control structure.
