Santa Fe, NM 87505-6303

**Subject: Submittal of Replacement Appendix B of the R-62 Well Completion Report**

Dear Mr. Kieling:

Enclosed please find two hard copies with electronic files of the replacement Appendix B of the R-62 well completion report, which includes the results from samples GW62-11-25564, GW62-11-25565, GW62-11-25566, and GW62-11-25567. The analytical results for these four samples were missing from the original submittal. In addition, several other samples collected for the analysis of anions, cations, and total organic carbon were not included in the original tables; these have been added to the appendix.

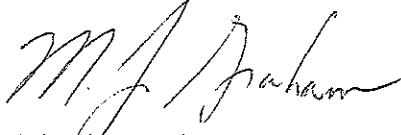

Because of the above additions to Appendix B, several clarifications for the main text of the report should be noted:

- Section 4.2, para. 1: Three samples were collected from the perched horizon encountered at a depth of 628 ft rather than one sample as originally indicated. These samples were analyzed for total metals, cations, and anions.
- Section 4.2, para. 2: A single sample was collected from the perched horizon encountered at a depth of 920 ft. This sample was analyzed for total metals, cations, and anions.

Los Alamos National Laboratory regrets any inconvenience the omission may have caused.

If you have any questions, please contact Ted Ball at (505) 665-3996 (tedball@lanl.gov) or Lance (Woody) Woodworth at (505) 665-5820 (lance.woodworth@nnsa.doe.gov).

Sincerely,

Michael J. Graham, Associate Director  
Environmental Programs  
Los Alamos National Laboratory

Sincerely,

Peter Maggiore, Assistant Manager  
Environmental Projects Office  
Los Alamos Site Office
