Santa Fe, NM 87505-6303

Subject: Request for Extension to Submit the Summary Report for Direct Current Resistivity Profiling in Cañon de Valle

Dear Mr. Kieling:

This letter requests an extension from the April 3, 2013, date to submit the summary report for direct current resistivity profiling in Cañon de Valle to a new date of September 30, 2013.

The U.S. Department of Energy (DOE) and Los Alamos National Security (LANS), LLC, request this extension in order to continue focusing efforts on accelerating the shipment of aboveground transuranic (TRU) waste from Los Alamos National Laboratory's Technical Area 54, Area G, to the Waste Isolation Pilot Plant. This focus will result in a material reduction of environmental risk. This acceleration of TRU waste shipments will also allow DOE/LANS to support the environmental priorities established by the New Mexico Environment Department and the State of New Mexico.

This new date to submit the summary report for direct current resistivity profiling in Cañon de Valle was developed to support the mutual goal of environmental risk reduction. This new date assumes that additional funding will be available beginning April 1, 2013, to support the completion of this work by September 30, 2013. DOE/LANS request this extension under Section III.J.2 of the March 2005 Compliance Order on Consent.

If you have any questions, please contact John McCann at (505) 665-1091 (jmccann@lanl.gov) or Cheryl Rodriguez at (505) 665-5330 (cheryl.rodriguez@nnsa.doe.gov).

Sincerely,

Jeff Mousseau, Associate Director
Environmental Programs
Los Alamos National Laboratory

Sincerely,

Peter Maggiore, Assistant Manager
Environmental Projects Office
Los Alamos Site Office
