Dear Mr. Kieling:

Subject: Notification of Class 1 Permit Modification to Attachment B, Part A Application for the Los Alamos National Laboratory Hazardous Waste Facility Permit, EPA ID # NM0890010515

The purpose of this letter is to notify the New Mexico Environment Department – Hazardous Waste Bureau (NMED-HWB) of a Class 1 permit modification to the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit (Permit) issued to the Department of Energy (DOE) and Los Alamos National Security, LLC (LANS), collectively the Permittees, in November 2010. The modification includes changes within the Attachment B, *Part A Application* and entails changes to the facility contact and address information, and updates the process codes and design capacity section for Technical Area (TA) 14, TA-16, TA-39, TA-54 West, TA-54, Area G, and TA-55.

The modification was prepared in accordance with Title 40 of the Code of Federal Regulations, (40 CFR) §270.42(a)(1). Changes to the Permit are pursuant to 40 CFR §270.42, Appendix I, Item A.1, administrative and informational changes. The modification includes the following: updated process codes and design capacity sections to incorporate the Permittees plan for closure of four units; encompassed two units that are included within the Permit but were not included in previous Part A Applications; and corrected a typographical error in previous Part A Application revisions. The two container storage units (TA-54, Area G Pad 11 and TA-55-185) were added to the Permittees hazardous waste management units at the time of Permit issuance but were not used for hazardous waste management at the time of previous Part A Application submittals; therefore, they were not included in the Part A Application. Additionally, the most recent updated version of the form from the Environmental Protection Agency is utilized within this permit modification.

This package includes this letter and an enclosure (LA-UR-13-24198) containing a description of the permit modification, and the full updated Part A Application. The form has been given a new revision number; therefore the updated form is not shown with editing marks. Accordingly, a signed certification page is also enclosed.

Three hard copies and one electronic copy of this submittal will be delivered to the NMED-HWB. A notice will be sent to the NMED-HWB-maintained LANL facility mailing list in accordance with the conditions specified in 40 CFR 270.42(a)(1)(ii).

If you have comments or questions regarding this permit modification, please contact Gene Turner of my staff at (505) 667-5794 or Mark Haagenstad, LANS, at (505) 665-2014.

Dear Mr. Kieling:

Subject: Notification of Class 1 Permit Modification to Attachment B, Part A Application for the Los Alamos National Laboratory Hazardous Waste Facility Permit, EPA ID # NM0890010515

The purpose of this letter is to notify the New Mexico Environment Department – Hazardous Waste Bureau (NMED-HWB) of a Class 1 permit modification to the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit (Permit) issued to the Department of Energy (DOE) and Los Alamos National Security, LLC (LANS), collectively the Permittees, in November 2010. The modification includes changes within the Attachment B, *Part A Application* and entails changes to the facility contact and address information, and updates the process codes and design capacity section for Technical Area (TA) 14, TA-16, TA-39, TA-54 West, TA-54, Area G, and TA-55.

The modification was prepared in accordance with Title 40 of the Code of Federal Regulations, (40 CFR) §270.42(a)(1). Changes to the Permit are pursuant to 40 CFR §270.42, Appendix I, Item A.1, administrative and informational changes. The modification includes the following: updated process codes and design capacity sections to incorporate the Permittees plan for closure of four units; encompassed two units that are included within the Permit but were not included in previous Part A Applications; and corrected a typographical error in previous Part A Application revisions. The two container storage units (TA-54, Area G Pad 11 and TA-55-185) were added to the Permittees hazardous waste management units at the time of Permit issuance but were not used for hazardous waste management at the time of previous Part A Application submittals; therefore, they were not included in the Part A Application. Additionally, the most recent updated version of the form from the Environmental Protection Agency is utilized within this permit modification.

This package includes this letter and an enclosure (LA-UR-13-24198) containing a description of the permit modification, and the full updated Part A Application. The form has been given a new revision number; therefore the updated form is not shown with editing marks. Accordingly, a signed certification page is also enclosed.

Three hard copies and one electronic copy of this submittal will be delivered to the NMED-HWB. A notice will be sent to the NMED-HWB-maintained LANL facility mailing list in accordance with the conditions specified in 40 CFR 270.42(a)(1)(ii).

ENCLOSURE 1

Class 1 Permit Modification to Attachment B, Part A Application for the Los Alamos National Laboratory Hazardous Waste Facility Permit, June 2013

LA-UR-13-24198

Date: JUN 14 2013

Permit Modification Notification

This document contains a notification for a Class 1 Permit Modification to modify the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit (Permit) issued to the Department of Energy and the Los Alamos National Security, LLC, collectively known as the Permittees, in November 2010. All changes have been made to Attachment B, *Part A Application*, and a full, updated form, Revision 10.0, is enclosed (Attachment 1).

Description

The modification updates the facility contact and address information, and the process codes and design capacity section for Technical Area (TA) 14; TA-16; TA-39; TA-54 West; TA-54, Area G; and TA-55 within the Attachment B, *Part A Application*. The process codes and design capacity section for TA-14, TA-16, and TA-39 was updated to incorporate a statement that the Permittees have notified of the intent to close units at these locations. The process design capacity for TA-54, Area G has been updated from 3,664,150 gallons to 4,346,590 gallons to account for the TA-54, Area G Pad 11 container storage unit that was added when the Permit was issued in 2010 but at the time did not previously store hazardous waste. The number of units at TA-54, Area G was also updated to 9 units to include this new unit. The process design capacity for TA-55 has also been updated from 178,500 gallons to 207,600 gallons to incorporate the addition of the TA-55-185 container storage unit that was also added when the Permit was issued. The number of storage units at TA-55 was updated to 7 to include the unit. The process design capacity at TA-54 West was changed to 11,660 gallons to correct a typographical error in previous versions of the form.

Basis

These changes must be made to the form to ensure it is up-to-date and can be certified as "true, accurate, and complete" as required by 40 CFR § 270.11(d) and as stated on the signature line of the Part A form. The new revision (10.0) of the Part A Application is classified as an administrative change pursuant to 40 CFR § 270.42, Appendix I, Item A.1, because no changes in requirements are proposed; only information updates to the application.

Discussion

The most recent form from the Environmental Protection Agency (http://www.epa.gov/osw/inforesources/data/form8700/8700-23.pdf) was used for this update and the address, signatories, and phone numbers were made current. A most recent list of environmental permits has also been incorporated into the beginning of the Hazardous Waste Permit Information Form.

Additionally, the process codes and design capacity section for TA-14, TA-16, and TA-39 have been revised to incorporate the Permittees intent to close units at these locations. At TA-14, the open burning and open detonation units near TA-14-23 will be closed rather than permitted. At TA-16, the opening burning unit known as the TA-16-399 Burn Tray will be closed. Lastly, at TA-39, the open detonation unit

near TA-39-57 will be closed. The Permittees have notified of the intent to close these units since the last update of the Part A Application in 2009. The change to the process design capacity for TA-54 West corrects an error so that the form includes the storage capacity for the units that is consistent with Attachment J, *Hazardous Waste Management Units,* within the Permit.

The process design capacity for TA-54, Area G has been updated to 4,346,590 gallons and the capacity at TA-55 has been updated to 207,600 gallons to be consistent with the capacity for all operating units at TA-54, Area G and TA-55 as listed in Attachment J, *Hazardous Waste Management Units*. Previous submittals of the Part A Application form were submitted to the NMED-HWB prior to issuance of the Permit. Because of this, the quantities of units and the unit storage capacities in the Attachment B, *Part A Application,* do not correspond to the number of units and the storage capacities listed in Attachment J, *Hazardous Waste Management Units*, of the Permit. The Part A Application form is designed to only cover current operations at a site and did not include proposed future units in the 2009 form that was last submitted. When the Permit was issued in 2010, two container storage units that were not included in the 2009 Part A Application form were authorized for use. Those units were TA-54 Area G, Pad 11 Storage Unit and the TA-55-185 Storage Unit. The number of storage units at TA-54 Area G and TA-55 have been revised to include these units and their capacities have been added to the form. This is only an informational update to the form and makes no changes to the operations at the units as they are authorized by the Permit and have specific permit conditions in the Permit.

All updates are included in Revision 10.0 of Attachment B, Part A Application (Attachment 1). Additionally, a signed certification page is included as Attachment 2.

9. Description of Hazardous Wastes – Enter information in the Sections on Form Page 5

A. EPA HAZARDOUS WASTE NUMBER – Enter the four-digit number from 40 CFR, Part 261 Subpart D of each listed hazardous waste you will handle. For hazardous wastes which are not listed in 40 CFR, Part 261 Subpart D, enter the four-digit number(s) from 40 CFR 261, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

B. ESTIMATED ANNUAL QUANTITY – For each listed waste entered in Item 9.A, estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in Item 9.A, estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

C. UNIT OF MEASURE – For each quantity entered in Item 9.B, enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE	CODE	METRIC UNIT OF MEASURE	CODE
POUNDS	P	KILOGRAMS	K
TONS	T	METRIC TONS	M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure, taking into account the appropriate density or specific gravity of the waste.

D. PROCESSES

1. PROCESS CODES:

For listed hazardous waste: For each listed hazardous waste entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the listed hazardous wastes.

For non-listed waste: For each characteristic or toxic contaminant entered in Item 9.A, select the code(s) from the list of process codes contained in Items 7.A and 8.A on page 3 to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

NOTE: THREE SPACES ARE PROVIDED FOR ENTERING PROCESS CODES. IF MORE ARE NEEDED:

1. Enter the first two as described above.

2. Enter "000" in the extreme right box of Item 9.D(1).

3. Use additional sheet, enter line number from previous sheet, and enter additional code(s) in Item 9.E.

2. PROCESS DESCRIPTION: If a code is not listed for a process that will be used, describe the process in Item 9.D(2) or in Item 9.E(2).

NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER – Hazardous waste that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. Select one of the EPA Hazardous Waste Numbers and enter it in Item 9.A. On the same line complete Items 9.B, 9.C, and 9.D by estimating the total annual quantity of the waste and describing all the processes to be used to store, treat, and/or dispose of the waste.

2. In Item 9.A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In Item 9.D.2 on that line enter "included with above" and make no other entries on that line.

3. Repeat step 2 for each EPA Hazardous Waste Number that can be used to describe the hazardous waste.

EXAMPLE FOR COMPLETING Item 9 (shown in line numbers X-1, X-2, X-3, and X-4 below) – A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operations. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

10. Map

Attach to this application a topographical map, or other equivalent map, of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers, and other surface water bodies in this map area. See instructions for precise requirements.

11. Facility Drawing

All existing facilities must include a scale drawing of the facility (see instructions for more detail).

12. Photographs

All existing facilities must include photographs (aerial or ground-level) that clearly delineate all existing structures; existing storage, treatment and disposal areas; and sites of future storage, treatment or disposal areas (see instructions for more detail).
