## Subject: Submittal of the Investigation Report for Area of Concern 01-007(k) in the Upper Los Alamos Canyon Aggregate Area

Dear Mr. Kieling:

Enclosed please find two hard copies with electronic files of the Investigation Report for Area of Concern 01-007(k) within the Upper Los Alamos Canyon Aggregate Area.

As previously discussed in our meeting on February 20, 2014, the investigation report for Area of Concern (AOC) 01-007(k) is being submitted separate from, and in advance of, the Phase II investigation report for Upper Los Alamos Canyon Aggregate Area. This report was prepared in response to a private property owner's request to document the absence of site contamination requiring corrective actions and to resolve site controls and potential land use restrictions before the sale and development of the property. AOC 01-007(k) is located on, and surrounded by, both developed and undeveloped private properties. Most of AOC 01-007(k) is situated on a parcel of private property that is currently vacant and is the subject of a pending private property sale.

The sampling data presented in this investigation report indicate the extent of contamination is defined at AOC 01-007(k), and no potential unacceptable risks or doses exist from chemicals of potential concern under the industrial, construction worker, and residential scenarios. The results of an ecological risk-screening assessment also indicate no potential risks to any ecological receptors at the site. Based on the sampling data and assessment results, no further investigation or remediation activities are necessary at AOC 01-007(k).

Given the request of the property owner, the U.S. Department of Energy and Los Alamos National Security respectfully request that the New Mexico Environment review and approve this report, after which we will submit a request for a certificate of completion without controls for AOC 01-007(k).

If you have any questions, please contact Todd Haagenstad at (505) 665-2936 (hth@lanl.gov) or Cheryl Rodriguez at (505) 665-5330 (cheryl.rodriguez@nnsa.doe.gov).

Sincerely,

Jeff Mouse

Jeff Mousseau, Associate Director Environmental Programs Los Alamos National Laboratory

Sincerely,

Piter Magg

Peter Maggiore, Assistant Manager Environmental Projects Office Los Alamos Field Office
