Dear Mr. Kieling:

Subject: Correction of Nitrate Salt-Bearing Waste Table as Requested by the New Mexico Environment Department

The purpose of this submittal is to replace a table previously transmitted to the the New Mexico Environment Department (NMED) on July 9, 2014. The U.S. Department of Energy (DOE) and the Los Alamos National Security, LLC (LANS), the Permittees, sent the original table in partial fulfillment of item # 13 of the *Summary Chart - Requested Information/Pending Issues* on July 9, 2014. This summary chart is included as part of the written submissions associated with semi-weekly technical phone calls held between the NMED and Los Alamos National Laboratory (LANL) as stipulated by the modification to Administrative Order No. 5-19001 issued by the NMED.

The enclosed table includes information on original nitrate salt-bearing waste containers and associated daughter containers and summarizes the location, relations, and waste profile number information for those containers. Corrections to the table were necessary because the original transmittal of this table did not print correctly and the locations of some waste containers were inadvertently omitted. The cause of the missing data was an issue in a single cell of the spreadsheet that resulted in data not appearing in one of the columns.

The pending information requested for item # 13 described above will be provided in a separate submittal as the documentation to fulfill that request is still being compiled at this time. If you have comments or questions regarding this submittal, please contact Mark P. Haagenstad at (505) 665-2014 or Gene E. Turner at (505) 667-5794.
