**Subject: NPDES Permit No. NM0030759 – Submittal of Analytical Results for Two Site Monitoring Areas**

Dear Ms. Johnsey:

These documents are being submitted in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) Permit No. NM0030759 for Los Alamos National Laboratory, issued to Los Alamos National Security, LLC, and the U.S. Department of Energy, effective November 1, 2010. As specified in Part I, Section E.1.(c):

Permittees shall certify completion of installation of control measures under this subsection to EPA within 30 days of completion of all such measures at the Site and, where applicable shall provide sampling results within 30 days of receipt of analytical results from the first measurable storm event after completion of such measures....

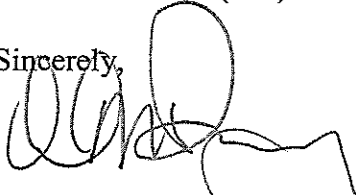

Accordingly, the analytical results from samples collected during the first measurable storm event received at two site monitoring areas (SMAs) in the last 30 days are enclosed. Each report provides references to the certificates of completion of the installation of the control measures. The analytical results can be accessed at the following website: <http://www.lanl.gov/community-environment/environmental-stewardship/protection/compliance/individual-permit-stormwater/index.php>.
