Subject: Request for Expedited Demolition Notification Approval for Structure TA-03-1966

Dear Mr. Kieling:

The National Nuclear Security Administration (NNSA) and Los Alamos National Security, LLC (LANS), (collectively the Permittees), are requesting an expedited demolition notification approval on structure 03-1966. In past years this structure was known as the "boathouse" and was used for storage of canoes for water quality sample collection in the Rio Grande. It is a three-sided dilapidated pole shed with dirt floors and has never had utilities. The structure was not recognized as an asset to Los Alamos National Laboratory (LANL) and NNSA, therefore, it was overlooked in the two past data calls for demolition notification. Currently the shed is in the path of construction for a new substation at Technical Area (TA)-03. The Permittees have a contractor on site with plans to remove the building by the end of the month. Without approval by the New Mexico Environmental Department – Hazardous Waste Bureau (NMED-HWB), construction of the new substation will be significantly impacted.

The enclosure attached to this letter satisfies the reporting requirements as outlined in Section 1.17.1 of the LANL Hazardous Facility Waste Permit (Permit).

The Permittees understand that investigations may not be complete at Solid Waste Management Units/Areas of Concern (SWMUs/AOCs) located within 50 feet of the building proposed for demolition. The Permittees will ensure that the sampling locations and depths proposed in the approved work plans for the SWMUs/AOCs identified are not affected by the demolition activities. In the case of adverse impacts on the SWMUs/AOCs identified in this notification, demolition activities will be documented so that the impacts are identified and evaluated. Accordingly, if a demolition report is prepared, the Permittees will provide a copy of the demolition report to the NMED-HWB within 30 days after the report is completed in accordance with Section 1.17.3 of the Permit.

If you have questions or comments concerning this request, please contact Karen Armijo (DOE/NNSA) at (505) 665-7314 or Mark Haagenstad (LANS) at (505) 665-2014.

Sincerely,

Michael T. Saladen Acting Group Leader Sincerely,

Karen E. Armijo

Permitting and Compliance Program Manager
