**Subject: 15-Day Sampling Notification for Accelerated Corrective Actions at  
Technical Area 39**

Dear Mr. Kieling:

On June 12, 2017, Los Alamos National Laboratory is scheduled to conduct soil sampling at several sites as part of an accelerated corrective action to be conducted in the North Ancho Canyon Aggregate Area. The sites to be sampled and remediated include two former waste stockpile areas, Solid Waste Management Units (SWMUs) 39-001(a) and 39-001(b); a capacitor storage area at SWMU 39-001(a); and a former container storage area, SWMU 39-007(a). The scope of the sampling and cleanups is included in the Phase II Investigation Work Plan for the North Ancho Canyon Aggregate Area, Revision 1, dated March 28, 2011 (EP2011-0115), and the New Mexico Environment Department approval with modifications letter, dated May 13, 2011 (HWB-LANL-10-104).

Sampling and remediation activities are expected to last approximately 2 months, from the middle of June 2017 to the middle of August 2017. The sampling results will be used to confirm the cleanup goals and will be presented in an accelerated corrective action report.

If you have any questions, please contact Bruce Robinson at (505) 667-1910 (robinson@lanl.gov).

Sincerely,

A handwritten signature in black ink, appearing to read 'Bruce Robinson'.

Bruce Robinson, Program Director  
Environmental Management – Environmental Remediation  
Los Alamos National Laboratory
