Santa Fe, NM 87505-1816

Dear Compliance Reporting Manager:

**SUBJECT: IDEA ID 856 – LOS ALAMOS NATIONAL LABORATORY
2013 SECOND QUARTER BERYLLIUM EMISSIONS REPORT
APRIL – JUNE, 2013 AIR QUALITY PERMIT NO. 634-M2**

Attached as Enclosure 1 you will find a copy of the sampling data obtained from the continuous air monitor installed on the main exhaust stack at the Beryllium Technology Facility (BTF) at Los Alamos National Laboratory (LANL) for the **second quarter of calendar year 2013**. This submission of the quarterly emissions data, collected from this source, is required by permit condition 5.f of NMED Air Quality Permit #634-M2 dated October 30, 1998. Furthermore, this quarterly report is transmitted within the allowed 60 days after the end of the calendar quarter, as specified in the permit.

As specified in permit #634-M2, the beryllium stack emissions from the BTF shall not exceed 0.35 grams in a 24-hour time period and shall not exceed 3.5 grams per year. As can be seen on the attached data sheet, the highest daily emission rate (HDER) during the second quarter of calendar year 2013 was $< 2.04 \times 10^{-5}$ grams per 24 hours, which is well below the daily permit limit. The total amount of beryllium emitted for the second quarter of calendar year 2013 was $< 1.72 \times 10^{-3}$ grams. Additionally, the total for the first two quarters of calendar year 2013 is $< 3.32 \times 10^{-3}$ grams, which is well below the 3.5 gram per year limit specified in the permit. Based on the attached information, LANL is in compliance with condition #2 of NMED Air Quality Permit #634-M2.

If you have any questions or comments regarding this submittal or would like to discuss this in greater detail, please feel free to contact Steve Story at 665-2169 or Kathleen Gorman at 665-1338.

Sincerely,

Anthony R. Grieggs
Group Leader
Environmental Compliance Program (ENV-CP)
