Degreaser

Sample Work Practice Checklist

ENV-ES, Environmental Stewardship Group

**MONTHLY WORK PRACTICE CHECK LIST  
TA-55-DG-1 DEGREASER**

R 05/21/2013

<b>Date of Action:</b>	<b>Location of Source :</b> (TA/BLDG/Room) TA-55-PF4-319	
<b>Monitoring Requirements(A1007.A<sup>1</sup>):</b>	<b>Yes/No</b>	<b>Comments</b>
1. Does the operator monitor and record the amount of solvent added to the degreaser?		
<b>Recordkeeping Requirements (A1007.A<sup>1</sup>)</b>	<b>Yes/No</b>	<b>Comments</b>
1. Are the actual emissions rate (pounds/month) of VOC and HAPS based on the quantity of solvent lost to evaporation calculated on a monthly basis?	Yes	Emissions are calculated using the Degreaser Compliance Database by ENV-ES.
2. Are the semi-annual emissions rate (tons/year) calculated for this source category and added to the facility-wide emissions rates in Table 106.B (Facility-wide Allowable Emissions)?	Yes	Emissions are calculated using the Degreaser Compliance Database by ENV-ES.
3. Does the operator maintain records of the degreaser solvent content?		
4. Does the operator maintain work practice checklists?		
5. Does the operator maintain records in accordance with Section B109, General Recordkeeping Requirements?		
<b>Operational Requirements (A1007.A<sup>1</sup>)</b>	<b>Yes/No</b>	<b>Comments</b>
1. Does the operator ensure the degreaser is closed with a tight fitting cover whenever not in use?		
2. Does the operator maintain a freeboard ratio of 0.75 or greater?		Glove box is included in freeboard ratio determination.
3. Does the operator ensure that all collected and stored waste solvent and wipe rags are placed in closed containers?		
4. Does the operator ensure that flushing is performed only within the freeboard area only?		All rinsing is performed within the freeboard area.
5. Does the operator allow cleaned parts to drip for 15 seconds or until dripping stops (whichever is longer)?		
6. Does the operator ensure that the solvent level does not exceed the fill line on the solvent level?		
7. Does the operator ensure that all spills are wiped up immediately?		
8. Does the operator ensure that there is no creation of observable splashing with agitation device?	N/A	An air or pump agitated solvent bath is not used.

Operational Requirements (A1007.A <sup>1</sup> ) continued	Yes/No	Comments	
9. Does the operator ensure that the degreaser is not exposed to drafts greater than 40 meters per minute (132 feet per minute)?		Glove box air flow rates based on system design descriptions average between 5 acfm (normal operating) up to 40 acfm maximum for a single glove box.	
10. Does the operator ensure that no sponges, fabric, wood or paper products are cleaned in the degreaser?			
<b>Notification Requirements:</b> If any of the boxes were checked with "No", please contact ENV-ES at 665-1338.			
<b>Comments:</b>			
<b>Form completed by:</b>			
_____	_____	_____	_____
Signature	Name (print)	Z number	Date

The permit section or condition noted at the end of each requirement is from the following reference:

<sup>1</sup> Title V Operating Permit No: P100-R1-M3

**All required documentation must be kept for a minimum of 5 years from the date it was gathered or from the date of the operating permit issuance (April 26, 2013).**

**At the end of each assessment period this form must be filed as an official record.**

**TEXT DESCRIPTION**

Install Lock-Out/Tag Out to the local disconnect at the Cyclone Unit  
 Requires 3 lockout/tag out cdd-6, 7 & 8  
 .Verify Zero energy to the unit.  
 Lubricate and inspect the chains on the rotary air lock valve and shaker.  
 .Lubrication of Rotor Bearings: Using an EP type grease quality grade 2  
 .grease the existing fittings located on the lubrication manifolds mounted on  
 the pillow blocks.  
 .Lubricating Motor Bearings: Remove the drain plug and then inject new  
 .grease at the fill hole. Replace the drain plug. Recommended grease  
 .should be Polyrea based bearing lubricant.  
 .Lubricate, inspect and repair the gear box and chain bearings in gear box.  
 .Verify proper operation oil level and add as needed.

Page: 2

.Change the Air lock valve gear box oil following every 5000 hours of operation.  
 .Check and lubricate all bearings associated with the Cyclone-Shaker unit as required.  
 .,Complete any lubrication, adjustments or replacement of any components associated with the conveyor unit, To include bearings, belts, rollers and all other associated components  
 .Complete lubrication of the shaker flange bearings following a 3 year recomm schedule.  
 Complete any maintenance, as needed, on all motors per manufacturers recommen  
 Remove the Lock OUT from the local disconnect.  
 POC: Melissa Metcalf

Utilities & Institutional Facilities Maintenance Procedure  
Servicing the Flue Gas Recirculating Fan

UI-PROC-76-39-014-R0

### 7.3 Follow-on Tasks

Ensure proper operation of the FGR fan. If any problem with operation is found, notify the Foreman and Superintendent so that corrective maintenance can be initiated.

All tasks were completed for this work instruction.

<u>JERRY LUJAN</u>	<u><i>Jerry Lujan</i></u>
NAME (Print)	NAME (Signature)
<u>217001</u>	<u>1-4-13</u>
Z-number	Date

Will corrective maintenance be required?

Yes  No

If yes, proceed in accordance with U&I work control process.

This procedure is complete.

Include the procedure number on the Work Documentation Form and attach signed copy of the procedure to the Work Package.

### 8 Records

Records generated as a result of implementing this procedure are maintained in accordance with the UI records program.

### 9 Abbreviations, Acronyms, and Terms

Abbreviation, Acronym, or Term	Definition
ESH&Q	Environment, Safety, Health, and Quality
FGR	Flue Gas Recirculating
TA	Technical Area
U&I	Utilities and Institutional Facilities

### 10 References

Operating & Maintenance Instructions, Robinson Industries, Inc.  
P101-3, Lockout/Tagout for Hazardous Energy Control

### 11 Appendices and Attachments

None

**AP-WORK-002: Attachment 11  
Work Documentation Form**

Work Order/Task: 442699-01

Start Date: 1-4-13 Completion Date: 1-4-13

Date/Hours	Summary of Work Performed/Materials Used:
1-4-13	Prejob by C. Salazar reviewed job hazards and job
1-4-13	Informed operations on work to be completed. Had operations line up FGR fans on #2 and #3. #2 FGR fan is on line. Greased fans using SCL 700. Cleaned up area. Put tools away and informed operations when work was completed.

Problems Encountered (delays, safety, etc.): NONE

Lessons Learned/Recommendations: NONE
