Mr. Ricardo Maestas, Acting Chief
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Building 1
Santa Fe, NM 87505-6313

Subject: Hazardous Waste Treatability Study Report for Calendar Year 2023

Dear Mr. Maestas:

This letter reports hazardous waste treatability studies for calendar year (CY) 2023 at the Los Alamos National Laboratory (LANL), EPA ID# NM0890010515 for the United States Department of Energy (DOE) National Nuclear Security Administration Los Alamos Field Office (NA-LA) and Triad National Security, LLC (Triad). Title 40 of the Code of Federal Regulations [40 CFR] § 261.4(f)(9) requires annual reporting of treatability studies conducted during the previous calendar year.

No treatability studies were conducted at LANL by NA-LA/Triad during CY 2023. One treatability study is tentatively planned for calendar year 2024 that will consist of less than 1 kg of radioactively contaminated sludge that is potentially a characteristic hazardous waste due to metal toxicity. If the waste is confirmed to be a hazardous waste, a notification per the requirements will be completed.

A notice of intent to conduct a study will be prepared and submitted to your office at least 45 days prior to beginning the study, as required by 40 CFR § 261.4(f)(1).

Please contact Jason Hill at (505) 551-2218 or by email at jshill@lanl.gov if you have questions.

Sincerely,
