**NOTICE OF CLASS 1 PERMIT MODIFICATION TO THE LOS ALAMOS NATIONAL LABORATORY
HAZARDOUS WASTE FACILITY PERMIT
EPA ID NO. NM0890010515**

The Department of Energy (DOE) and the Los Alamos National Security, LLC (LANS) have submitted a Class 1 permit modification request to modify the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit issued to DOE/LANS in November 2010. The changes have been submitted as self-implementing modifications and modifications that require review and approval by the New Mexico Environment Department Hazardous Waste Bureau (NMED-HWB).

The permit modification request was submitted to the NMED-HWB on April 3, 2012. Eighty-six of the changes described in the modification package included administrative changes, informational changes, and correction of typographical errors. The additional ten changes to the Permit described in the permit modification request are also minor changes that clarify permit requirements or change the titles of organizations or sections and require review and approval by the NMED-HWB prior to implementation.

The basis for the request has been included in the permit modification. Changes included in the permit modification request do not substantially alter permit conditions or reduce the capacity of the facility to protect human health or the environment. These changes have not been made in response to changes in the types or quantities of the waste managed, technological changes in waste management procedures, new regulations or to remove emergency equipment which is the basis for higher level modifications as discussed at 40 CFR §270.42(d).

The official permit can be found on the NMED-HWB webpage at: <http://www.nmenv.state.nm.us/HWB/lanlperm.html#FinalPermit> and the permit modification submittal can be found at LANL's electronic Public Reading Room (<http://epr.lanl.gov>). If you have any questions regarding this permit modification request please contact Mark Haagenstad at (505) 665-2014 or mph@lanl.gov.
